CERCO FIRE USE FACT SHEET June 7, 2006

Location: Legal description: T7S R18W South end of Section 15, 6 miles South East of Reserve.

Detected: June 6, 2006

Cause: Lightning

Management: **“Wildland Fire Use for resource benefit”** to meet the following objectives: 1) Provide for the safety of firefighters and the public by reducing the fuel load of pine needles and dead and down trees. If this debris is allowed to accumulate on the forest floor, the potential for a large, catastrophic fire is greatly increased; 2) Maintain the grasslands and reduce the number of piñon-juniper and small ponderosa pine trees to prevent them from taking over the grasslands; 3) Increase the quality of grasses and forbs by burning off the dead layer of grasses and adding nutrients to the ground; and 4) Improve habitat conditions for a variety of wildlife species, including elk, deer, turkey, etc.

Status: Fire Managers will be monitoring the fire. Current fire activity is of low to moderate intensity (flame lengths from one foot to three feet).

Size: 1/10 acres

Resources: (Reserve District)

Note: Flame will be visible and smoke could be present for several weeks.

If you have any questions about the Cerco WFU, please contact the Reserve Ranger District at (505) 533-6231.
